Dear Customers,

Date: Feb 17<sup>th</sup>, 2016

**Re: YOKE temporarily stop supplying Insulated Blank Swivel**

Recently we're informed by our material supplier that the dielectric layer being applied in the NASA project is now discontinued owing to the uncertain availability of raw materials.

We regret that we are forced to temporarily stop supplying Insulated Blank Swivel (YOKE#8-088 series) and related products shown as following table. Therefore, we can't at present entertain any new orders owing to the shortage of materials.

We're checking the availability with other suppliers for the material we need. Once we find an alternative supplier, we need time to get the product verification. We assure you, however, that we shall contact you as soon as the recovery is completed.

Apology for the inconvenience it causes.

**Affected Products:**

Insulated Blank Swivel	8-088
Insulated Swivel	8-132/8-121/8-122/8-123/8-124/8-125/8-126/8-130

Thank you and best regards,

YOKE Industrial Corp.
